We kindly request that you provide your clients, customers, and participants with copies of this unique training opportunity with stipend announcement.

DC-CHPC offers DC residents the opportunity to receive 30 to 35 hours of training that leads to consideration for positions in community health education/work, COVID-19 contact tracing, rapid response to community emergencies, emergency medical assistance, and positions in the social services. Although residents throughout DC may apply, we are particularly interested in Wards 7 and 8 residents in the 18 to 30 and over 55 age groups.

Online training with stipend will begin by October 25, 2020. Upon training completion and earning certifications attached to the training, newly trained Community Health Educators/Workers (CHEs) will provide COVID-19 related training to Wards 7 and 8 residents and organizations operating in Wards 7 and 8. CHEs also will join extensive outreach and marketing efforts that encourage residents of Wards 7 and 8 to receive COVID-19 testing at neighborhood sites. These experiences plus training will increase participants' employment marketability and competitiveness.

The application is provided below. The submit button at the end of the application allows forwarding to DC-CHPC. For additional information, contact info@dcchpc.org or call (202) 642-9856.

Application deadline is 5:00 PM- October 16, 2020.

*As with all funded programs, DC-CHPC training is dependent on funding allocations.
